**Content Focus:** Domain of OT: Performance Skills, Client Factors, Context

Occupational Therapy Process: Intervention

## Learning Objectives- Splinting Course

Upon completion of this course, participants will be able to:

1. Recognize indications, precautions and contraindications for mobilization splinting of the upper extremity
2. Analyze mechanical properties required to fabricate low temperature thermoplastic mobilization splints for the upper extremity.
3. Compare and contrast outrigger/ and or coil designs of mobilization splints.
4. Identify important anatomical structures and landmarks of the upper extremity.
5. Analyze key characteristics of splinting materials for fabrication of specific splints.
6. Learn to critique and assess different splinting materials.

Workshop Format: Power point presentation, splinting demonstration, lecture and hands on fabrication of splints will guarantee achievement of learning objectives.

## Instructor

**Debby Schwartz, OTR/L, CHT**

**Product and Educational Specialist, Physical Rehabilitation**

Debby Schwartz, OTR/L, CHT is a hand therapist with over 20 years of experience as a practicing clinician. She has joined Orfit Industries America to promote product awareness and splinting education. Debby is an active member of ASHT and has participated in IFSHT meetings as well. She has presented on a variety of hand therapy topics both at national and international conferences and has written a number of articles for hand therapy publications.

*A Certificate of attendance will be issued to all participants completing the CEU requirements. One day equals 8.0 contact hours (.8 CEU's). This splinting workshop meets criteria "A" for hand therapy certification and is accepted by NBCOT and most state OT boards.*
